Projects

- **E-commerce**
   This is a platform for shopping lovers where the shopping process is easier because people can shop online, which helps people to save time by searching for products they like in less time. This application also provides a huge platform to retailers where they can showcase their products to a large number of customers. This application provides shoppers with more options in products and easy payment modes, which indeed helps shoppers with an easy shopping experience.
- **Clothe shop management system (mini)**
   This application software contains all the record about shop. Stores all the history of bill and all transaction. For this project language for front end is VB.Net and for backend SQL is used.
- **Agency management system (live and major)**
   This project is major project. Which having 6 forms and holds all the information about customer, user, products, bills and about agency.
